To help you plan and design your Create a Safe Medicine List Together

Procedure To Create a Medicine List

The Procedure To Create a Medicine List provides the steps to take to create a safe medicine list together. This procedure includes steps to take before the appointment, to create the medicine list if the patient has brought in the medicines, and to create the medicine list if the patient has not brought in the medicines. It also includes steps for the clinician during the appointment.

Create a Safe Medicine List Together Checklists

The Create a Safe Medicine List Together strategy has two checklists: one checklist to use when patients bring in their medicines and another

2. Make Decisions for Your Implementation

You will need to make several decisions to support the design of your Create a Safe Medicine List Together implementation. These are listed in the Quick Start Guide and include decisions on:

- How you will obtain materials,
- What the scope of your implementation will be,
- What the work ow will be in your implementation,
- How you will encourage and reinforce the use of the strategy, and
- Who will champion the implementation.
